

Interview Scheduling Software

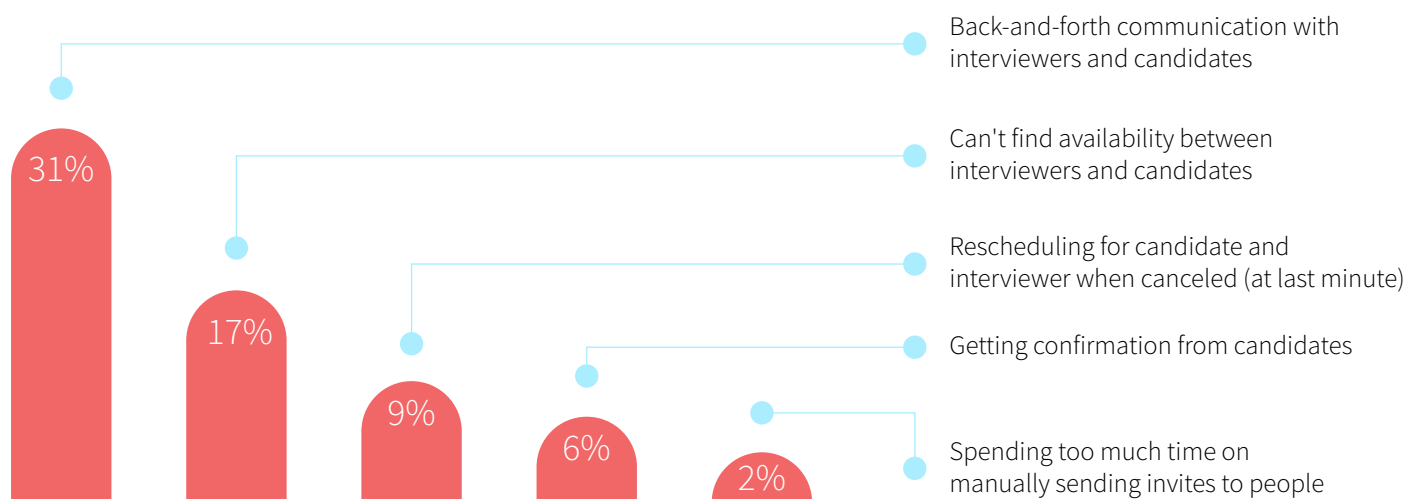

ABOUT INTERVIEW SCHEDULING

The see-saw game of manually scheduling interviews among recruiters, interviewers, and candidates can be lengthy and inefficient. Insights from our interviews with 500+ companies of all sizes and industries in the U.S., U.K., and Canada show that scheduling and rescheduling interviews are very time-consuming and error-prone. These activities take up all of a recruiter's time that can be spent on handling more important hiring tasks.

Challenges of scheduling interviews manually

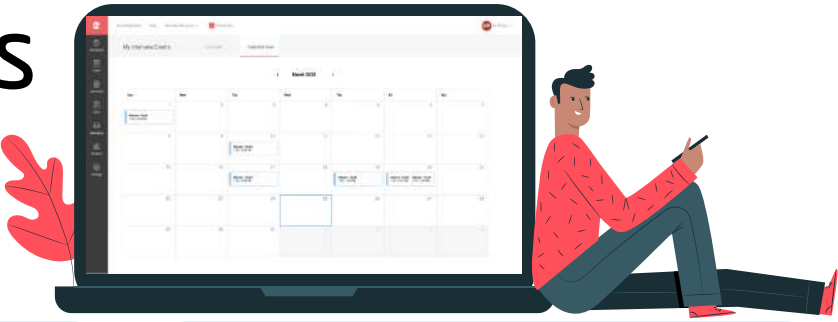

Based on Rakuna's interviews with 500+ companies from the U.S., U.K., and Canada

With the desire of solving recruiting coordinators' frustrations, Rakuna's Interview Scheduling software provides one central hub for recruiters to schedule complex interviews more efficiently by streamlining, automating, and syncing the entire scheduling and interviewing process for all parties involved.

As a result, recruiters spend less time manually scheduling and have an easy-to-access interview schedule and centralized candidate database to make quick hiring decisions.

KEY FEATURES & BENEFITS

Features

-  Ability to quickly view multiple interviewers' and rooms calendar availabilities, and generate mass timeslots with just a few clicks
-  Allow candidates to self-schedule at their conveniences
-  Allow interviewers and candidates to proactively re-schedule interviews online
-  Ability to submit interview assessment real-time and generate team discussion in one central hub
-  Automate customized communications with candidates and interviewers pre- and post-interviews
-  Ability to further integrate with ATS
-  Ability to further integrate with text recruitment

Benefits

-  Eliminate back-and-forth communications with interviewers and schedule interviews 10x faster
-  Save time by speeding up the process of candidates scheduling
-  Provide maximum conveniences and eradicate back-and-forth communications when rescheduling
-  Streamline the assessment process, enhance team collaboration, and make quicker hiring decisions
-  Reduce no-shows and provide positive experiences for all candidates and interviewers
-  Avoid duplicated tasks with synced-up data across multiple platforms
-  Increase communication efficiency
